

AniVi

TECH ENGINEERING SOLUTIONS

YOU BUILD, WE AUTOMATE

Welcome to Anivi Tech, where engineering solutions come to life through automation. Our tagline, 'Automate your Engineering solutions with Anivi tech,' encapsulates our core ethos: Automation for optimization. You build, we automate.

Delve into the realm of cutting-edge engineering solutions tailored to your business needs. Our dynamic and youthful team embraces a tech-first approach to optimise your operations. Recognizing technology's disruptive potential, we harness state-of-the-art innovations to fuel your growth.

Based in Talawade MIDC Pune, Maharashtra, Anivi Tech Engineering is a beacon of innovation. Our unwavering commitment to excellence propels us to deliver a spectrum of advanced engineering solutions. From Automation line fixtures to Material handling solutions to Precision gauges & tools, we cater to diverse industries: Automobile, Foundries, Pharmaceutical, Electronics, Agriculture, medical, chemical and Food.

Service offerings:

- 1. Automation line fixtures
- 2. Material handling solutions
- 3. Indexable cutting tools

Automation Line Fixtures:

Transform intricate manufacturing processes into seamless automation. This synergy empowers VMC and other machinery to produce rapid, flawless results. With over 300 successfully completed fixtures spanning industries such as automobiles, heavy fabrication, food, agriculture, and plastics, our expertise is unparalleled.

- ☐ Welding Fixtures: Precision boom arm welding solutions.
- ☐ Checking Fixtures: Ensure child safety with force checking fixtures.
- ☐ Assembly Fixtures: Streamline assembly processes.
- ☐ BIW Fixtures: Elevate Body in White assembly techniques.

Checking Fixtures

Hydraulic Fixtures

Material Handling Solutions:

Elevate industrial handling, material conveying, and lifting. Our solutions epitomise robust design, swift accessibility, and efficiency, with advantages that include effortless transportation and easy access to products/materials.

Conveyor Systems:

Ranging from 50g to 5000 kg capacity, facilitate seamless material movement in industries like automotive, agriculture, electronics, food processing, pharmaceuticals, and more. Choose from options like belt conveyors, heavy roller conveyors, pallet conveyors, powerized roller conveyors, gravity roller conveyors, and more.

Jib Cranes:

Enhance material handling with overhead lifting precision. Our compact and robust jib crane solutions cater to diverse industries, enabling both repetitive and unique lifting needs.

Wall-Mounted Jib Cranes: Space-saving solutions.

Articulating Jib Cranes: Flexibility meets functionality.

Pillar-Mounted Jib Cranes: Efficient handling at its finest.

Industrial Manipulators:

Seamlessly control and lift materials with precision. Our industrial manipulators, guided by skilled operators, ensure safe and efficient material handling for even the heaviest loads.

Pillar-Mounted Manipulators: Rigid solutions for controlled lifting.

Overhead Trolley-Mounted Manipulators: Elevate material handling possibilities.

Scissor lift:

A scissor lift is a portable ,hydraulic -powered platform that usually moves vertically. Mechanism to achieve this is the use of linked , folding supports in a criss-cross ' X ' pattern.

Indexable cutting tool:

Providing solutions on boring bar for VMC & HMC , indexable cutting tools, engineering manufacturing excellence and machined components.

PRODUCT RANGE:

Micro Boring unit (MBU 16, MBU 20, MBU 22, MBU 32)

Boring tools (For VMC, HMC & SPM)

Milling cutters

Combination tool

Indexable end mill

U DrillCore drill

Spot facing cutter

T slot cutter

Side & face cutter

Radius cutter

Why choose us ??

Our team of highly skilled young engineers is dedicated to crafting high-quality, in-house machining set up , cost-effective solutions tailored to your exact requirements. Whether conceptualising, designing, fabricating, or executing intricate engineering projects, we exceed expectations, fostering success.

At Anivi Tech, we redefine possibilities by fusing engineering expertise with cutting-edge automation. Your growth is our mission; join us on this journey to engineer success.

Corporate office:

Gat no 264, Jyotiba Nagar, Talawade, Pune 412114
